CONTENTS

Volume 15

Number 1, March, 1969

N.A. KRASSILNIKOV, C.M. KHODJIBAYEVA and T.G. MIRCHINK: Properties of toxins of *Verticillium dahliae*, the causative agent of cotton wilt disease. 1

H. IIZUKA, H. OKAZAKI and N. SETO: A new sulfate-reducing bacterium isolated from antarctica. 11

H. MOMOSE, K. IWANO and R. TONOIKE: Studies on the aggregation of yeast caused by lactobacilli. IV. Force responsible for aggregation. 19

I. SHIIO, H. MOMOSE and A. ÔYAMA: Genetic and biochemical studies on bacterial formation of L-glutamate. I. Relationship between isocitrate lyase, acetate kinase, and phosphate acetyltransferase levels and glutamate production in *Brevibacterium flavum*. 27

S. NOGUCHI and S. KOGA: Protonic conduction of artificial lipid menbranes. 41

T.T. KUO and T. KOSUGE: Factors influencing the production and further metabolism of indole-3-acetic acid by *Pseudomonas savastanoi*. 51

I. SHIIO and R. UCHIO: Microbial production of amino acids from hydrocarbons. IV. L-Glutamic acid production by *Corynebacterium hydrocarboclastus* R-7. 65

T. NAKASE and K. KOMAGATA: DNA base composition of the genus *Hansenula*. ... 85

K. YAMAGUCHI, H. MATSUZAKI and B. MARUO: Participation of a regulator gene in the α-amylase production of *Bacillus subtilis*. 97

T. SATO, K. AIDA and T. UEMURA: Contribution of glycolysis to catabolite repression of L-tryptophanase synthesis in *Escherichia coli*. 109

Short Communication

A.L. DEMAIN: Specificity of pyrimidine requirement of an auxotroph of *Bacillus subtilis*. 123

Number 2, June, 1969

H. IIZUKA and Y. NISHIMURA: Microbiological studies on petroleum and natural gas. X. Carotenoid pigments of hydrocarbon-utilizing bacteria. 127

J. HIRANO, C.E. GEORGI and W.E. MILITZER: Localization of the succinic dehydrogenase system in bacteria 135

I. TAKEDA: Species specificity of L-histidine acceptor t-RNA from microbes. 147

K. SAKAGUCHI and H. MORI: Comparative study on *Pediococcus halophilus*, *P. soyae*, *P. homari*, *P. urinae-equi* and related species. 159

S. YASHIMA and K. KITAHARA: Oxidative decarboxylation of 6-phosphogluconate in *Leuconostoc mesenteroides* B07. II. Purification and properties of a new enzyme catalyzing decarboxylation of 2-keto-6-phosphogluconate. 169

Y. YAMADA, K. AIDA and T. UEMURA: Enzymatic studies on the Oxidation of sugar and sugar alcohol. V. Ubiquinone of acetic acid bacteria and its relation to classification of genera *Gluconobacter* and *Acetobacter*, especially of the so-called intermediate strains. 181

J.N.S. YADAVA and B.M. GUPTA: Antigenic analysis and biochemical characters of strains of *Escherichia coli*, commonly associated with human diarrhoea, isolated from sporadic cases of gastro-enteritis in local population of domestic animals. ... 197
H. TAKAHASHI, H. SAITO and Y. IKEDA: Conserved portion in bacterial ribosomal RNA. ... 209
M. SATO and H. TAKAHASHI: Cold shock of bacteria. II. Magnesium-mediated recovery from cold shock and existence of two critical temperature zones in various bacteria. ... 217
K. KOMAGATA and M. OKUNISHI: Histochemical studies on the development of carpophore of *Coprinus kimurae*. ... 231

Short Communication

L.U. RIGO and L.A. VEIGA: Determination of galactokinase activity by galactose oxidase of *Polyporus circinatus*. ... 239

Number 3, September, 1969

K. KOMAGATA, K. YAMADA and H. OGAWA: Taxonomic studies on coryneform bacteria. I. Division of bacterial cells. ... 243
K.G. MUKERJI and V.R. RAO: Fungi of Delhi. XIII. Two interesting records from soil. ... 261
I. SHIIO and K. SANO: Microbial production of L-lysine. II. Production by mutants sensitive to threonine or methionine. ... 267
S. YASHIMA and K. KITAHARA: Oxidative decarboxylation of 6-phosphogluconate in heterolactic bacteria. ... 289
A.M.H. EL-REFAI, L.A.R. SALLAM and I.A. EL-KADY: Microbiological transformations of progesterone. ... 301
L.A.R. SALLAM, A.M.H. EL-REFAI and I.A. EL-KADY: Thin-layer chromatography of some C_{21}, C_{19} and C_{18} steroids. ... 309
T. KANEKO, K. KITAMURA and Y. YAMAMOTO: *Arthrobacter luteus* nov. sp. isolated from brewery sewage. ... 317
L.L. BARTON, D.R. LINEBACK and C.E. GEORGI: The influence of nitrogen and carbon sources on the production of glucoamylase by Aspergilli. ... 327
T. SAI, K. AIDA and T. UEMURA: Studies on (−)-citramalic acid formation by respiration-deficient yeast mutants. V. Purification and some properties of citramalate condensing enzyme. ... 345
P.S. BASU, B.B. BISWAS and M.K. PAL: Molecular mechanism of gram staining ... 365
K. VADALKAR, H.D. SINGH, J.N. BARUAH and M.S. IYENGAR: Utilization of gas oil in the production of single cell protein. I. Isolation and characterization of gas oil-utilizing yeasts. ... 375

Short Communication

S.D. TAPTYKOVA, L.V. KALAKOUTSKII and N.S. AGRE: Cytochromes in spores of actinomycetes. ... 383

Number 4, December, 1969

F. YOSHINAGA: Studies on the fermentation production of L-proline. IV. Mechanism of L-proline production by *Brevibacterium flavum* 2247 No. 14-5. ... 387

H. MOMOSE and I. SHIIO: Genetic and biochemical studies on 5'-nucleotide fermentation. IV. Effect of GMP reductase and purine analogue resistance on purine nucloeside accumulation pattern in adenine auxotrophs of *Bacillus subtilis.* 399
S. YASHIMA and K. KITAHARA: Quantitative studies on enzyme system of heterolactic fermentation. II. Intracellular activity of 6-phosphogluconate dehydrogenase during glucose fermentation. 413
S. YASHIMA and K. KITAHARA: Quantitative studies on enzyme system of heterolactic fermentation. III. Intracellular activity of 2-keto-6-phosphogluconate decarboxylase during glucose fermentation. 421
S. NAGAI, Y. NISHIZAWA and S. AIBA: Kinetics of nucleic acid synthesis in the growth of *Azotobacter vinelandii.* 427
Y. KAMIO, S. KANEGASAKI and H. TAKAHASHI: Occurrence of plasmalogens in anaerobic bacteria. 439
T. IIJIMA and Y. IKEDA: The saline-sensitive phenomenon in *Bacillus subtilis.* 453
O. KANAMITSU and Y. IKEDA: Genetics of the temperature-dependent and -sensitive revertants obtained from threonine-requiring mutants of *Bacillus subtilis.* 463
P. BHATTACHARYYA and S.K. BOSE: Studies on sporulation and production of mycobacillin, an antifungal polypeptide, by *Bacillus subtilis.* 473

Short Communication

M. SATO and H. TAKAHASHI: Cold shock of bacteria. III. Recovery from cold shock in radiosensitive and radioresistant mutants of *Escherichia coli.* 483
